

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 14, 2016 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (155 new fires)
New large incidents:	1
Large fires contained:	4
Uncontained large fires:**	8
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires:	34
New large incidents:	0
Uncontained large fires:	2
Type 2 IMTs committed:	1

Tenderfoot, Phoenix District, BLM. IMT 2 (Sinclair). One mile south of Yarnell, AZ. Brush and tall grass. Minimal fire behavior.

Jack, Coconino NF. Previously reported incident. One mile southeast of Happy Jack, AZ. Timber. Active fire behavior with group torching and backing. Last report unless significant activity occurs.

North, Cibola NF. Previously reported incident. Twenty-five miles southwest of Magdalena, NM. Timber. Moderate fire behavior with flanking, backing and isolated torching. Structures threatened. Road, trail and area closures in effect. Last report unless significant activity occurs.

Escondida, Socorro District, New Mexico State Forestry. Four miles north of Socorro, NM. Chaparral, brush and tall grass. No new information.

Predictive Services Discussion: An upper low over the Northwest will keep southwesterly flow through the Intermountain West. A front will move through the Northwest and northern Rockies, bringing showers and thunderstorms to the region. A few thunderstorms will also form over the northern Great Basin and the central Rockies. A lingering front across the Plains to the Mid-Atlantic will provide a focus for showers and thunderstorms. Afternoon thunderstorms will also develop in the Southeast. A ridge building over the Plains and the East will warm temperatures across the southern Plains and the Southeast. Cooler conditions will move into most of the Intermountain West, with only the deep Southwest remaining very warm. Mild conditions will continue across the northern Plains to New England. In Alaska, a ridge will build across the west, raising temperatures across most of the state. Isolated showers or thunderstorms will dot the central and eastern Interior and parts of the north.

LOOKOUTS (LCES)

Operational Engagement Category

Lookouts are often better situated to notice the cumulative changes of fire behavior.

- Fire Order #5 says “Post lookouts when there is possible danger.” Should you utilize lookouts at all times?
 - Lookouts should be posted at all times.
- What are you looking for when you are selecting a lookout location?
 - Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
 - Never rely exclusively on aircraft as your lookout.
- What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?
 - Experienced firefighter.
 - Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
 - Knowledge of crew locations, escape and safety locations and trigger points.
 - Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
 - Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.
- What is the necessary equipment for a lookout?
 - PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, water and watch.
